

SWITCHABLE GLASS

Widely used in offices, hotels, banks, Hospitals, stores, clubs, villas and other places.

About Switchable Glass

Switchable glass with Filmbase's premium Polymer Dispersed Liquid Crystal (PDLC) technology allows glass to turn on, off, or anywhere in between in milliseconds for diverse light control applications.

Switchable glass in the absence of an electric field, the electronically controlled PDLC film is in an opaque state. When an alternating current is applied, at which point the switchable glass changes from an opaque state (OFF) to a transparent state (ON).

Dynamic Privacy

Complete privacy or transparency when you need and want it most.

Temperature Control

Solar Control smart films reflect IR light providing cooler interiors and less HVAC costs.

High ROI

Mitigate longterm costs associated with cleaning, cooling, and signage.

Dynamic Designs

Custom shapes and patterns add style and function to windows and partitions.

Optimize Space

Replace thick studded walls with thin partitions or section open floor plans with minimalist solutions.

Easy To Clean

Eliminate fabric or electronic curtains that are hard to clean and collect germs while affecting designs.

Anti-noise

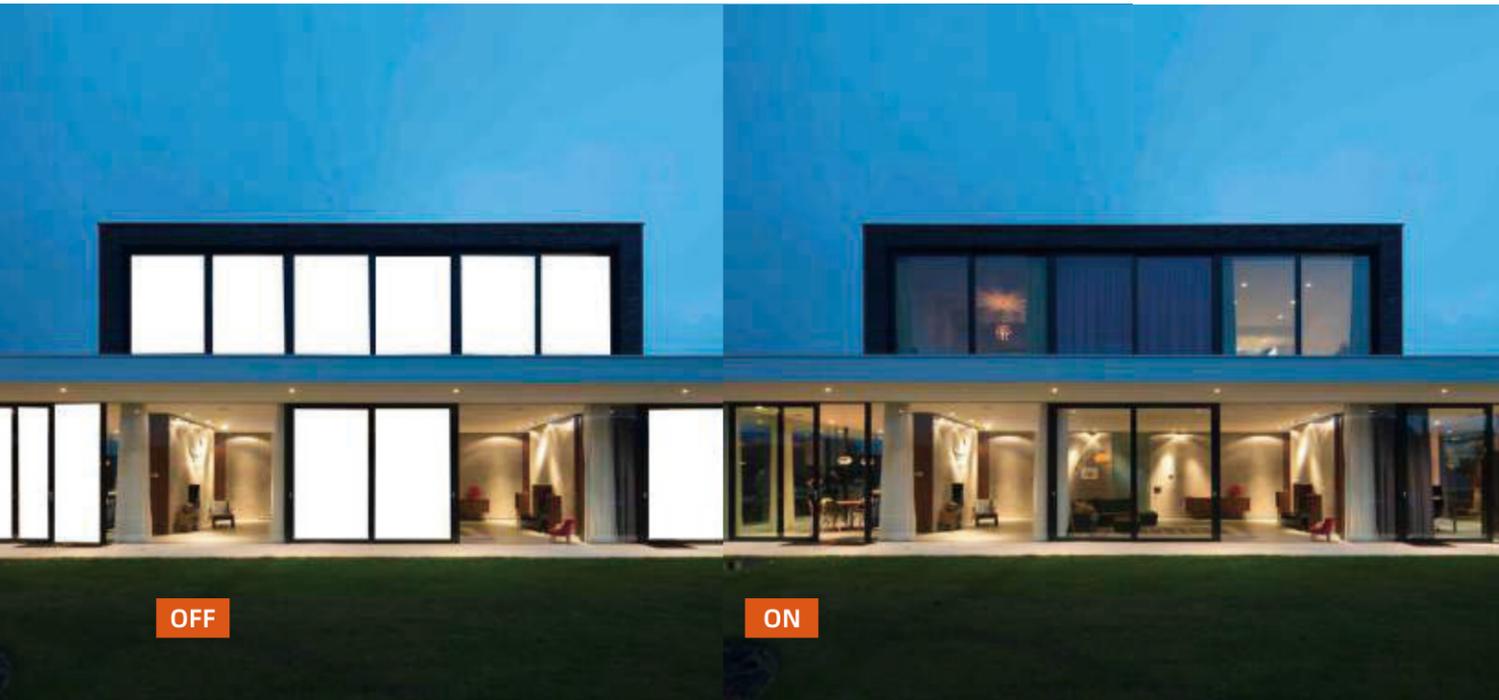

Compared with ordinary glass, the anti-noise ability of glass using Filmbase PDLC film is increased by 20%.

Various control methods

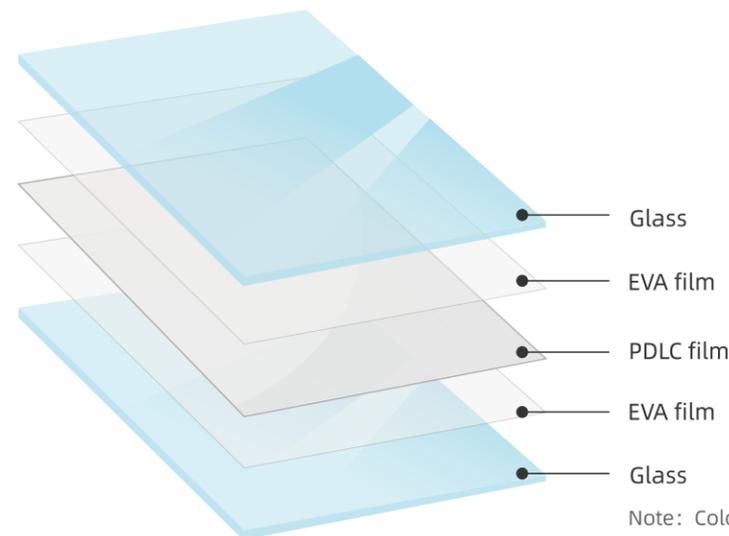

In order to meet your various needs, you can choose your preferred control method: remote control, wired control, infrared induction, voice control, mobile application, etc. In addition, an FM transformer can be selected to gradually change the film.

FILMBASE 0404/0505/0606

Filmbase switchable smart glass with PDLC film sandwiched in two pieces of glass of the same thickness, when power on it is transparency, when power off it becomes opaque, with glass and smart curtain in one technology, plus support rear projection to display videos, pictures and letters. Which can be widely used in space partition or facade where more open view, privacy and display functions needed. 85%, 87% and 91% transmittance, colorful available.

Note: Color and thickness do not represent the actual situation, only for the convenience of illustration.

FILMBASE Smart facade glass

Switchable glass is a new type of laminated structural glass, combining PDLC film between two layers of glass at high temperature and high pressure after the overall formation of bonding. With a controller, it can instantly switch between opaque and transparent.

Note: Color and thickness do not represent the actual situation, only for the convenience of illustration.
